DETAILED ACTION

Specification

1. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).

Claim Rejections - 35 USC § 102

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 5 are rejected under 35 U.S.C. 102(a) as being anticipated by Krzesicki et al '599.

Krzesicki shows a four wheel drive apparatus comprising an engine 12 that drive a front wheel shaft of a vehicle and connected to a generator 24 that generates electric current to drive an electric motor 28 for driving the rear wheel shaft through a clutch 32 interposed between the motor and a rear wheel shaft when it is determined that four-wheel drive is required (figure 1 - 3, page 1 - 4).

Allowable Subject Matter

3. Claims 2 – 4 and 6 – 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamada et al '307, Yamamoto et al '593, Tabata et al '045, Suzuki '426 and Mikami et al '840 show various four-wheel drive apparatus but failed to show the apparatus as claimed.

Torii et al '870 discloses a four-wheel drive apparatus using a detecting means that computes the difference between the front and rear wheel shafts but failed to disclose the method as claimed.
